EDUCATION

CMR Institute of Technology **Bengaluru, KA**
Btech in Information Science and Engineering(CGPA : 7.88) Graduation Date : July 2027

PROJECTS

Ransomware Threat Detection and Protection

- Designed and implemented an ML-based anomaly detection system using Java Swing and PostgreSQL to detect database file anomalies.
- Built automated functionality to replace corrupted files with newly encrypted versions (AES), maintaining secure and updated records.
- Integrated a secure data destruction mechanism to remove compromised files and prevent unauthorized access.
- Tech Stack: Java, Java Swing, PostgreSQL, Machine Learning (Anomaly Detection), File Encryption (AES), JDBC.

AI-Based Music Recommendation System

- Developed a full-stack web application that generates personalized music recommendations based on user mood input and Spotify listening behavior.
- Implemented a hybrid recommendation system using K-Means clustering and cosine similarity to match user preferences with songs.
- Integrated Spotify Web API with OAuth 2.0 for secure authentication and dynamic retrieval of user data (top tracks, artists, recent activity).
- Built an interactive dashboard to display user listening insights and enhance personalization.
- Tech Stack: React.js, Node.js, Express.js, Python, Scikit-learn, Spotify API, HTML, CSS, JavaScript Certification

Authentication Website

- Built a certificate verification web application using React.js and Node.js with Google Sheets as the backend datastore.
- Implemented an API to validate enrolment IDs and fetch corresponding certificate links for downloading (PDF/JPEG).
- Designed a responsive UI with error handling and a secure login workflow for basic authentication.
- Tech Stack: React.js, Node.js, Express.js, Google Sheets API, HTML, CSS, JavaScript.

INTERNSHIP EXPERIENCE

Business Analyst Intern — Pync | Bangalore, KA
September 2024 – December 2024

- Analyzed and maintained daily operational records of cleaning partners to ensure data accuracy, consistency, and accountability.
- Managed and tracked financial accounts while generating performance and growth reports to support data-backed decision making.
- Conducted data analysis on business growth trends to support efficiency improvement, operational planning, and actionable insights.

SKILLS

- **Programming Languages:** C, Java, Python
- **Web Technologies & Frameworks:** HTML, CSS, JavaScript, Node.js, Express.js, React Native, REST API
- **Databases & Tools:** MySQL, MongoDB, PostgreSQL, MS Excel, Google Sheets
- **Data Analytics & ML:** Power BI, Tableau, Machine Learning Basics
